

NAOMI

IS NOW 14 YEARS OLD

August 2018

Naomi lives in a rural area near Makindu town. She lives with her grandmother and her cousins. Their grandmother is needy and very old.

Naomi is a 14 year old girl.

She is in class five at Trinity Academy in Makindu. She is a day's scholar and she walks close to four and half miles to school every morning. She is a hardworking girl and through her hard work she has been performing very well in school. She likes coming to the Centre on Saturdays and during holidays.

Naomi is on care and had been feeling unwell before they closed school, the report we got from the hospital was that her viral load is very high and it needed to be suppressed. We have organized Kids club for children on care in order to train them on drug adherence.

Naomi is jovial girl who interacts very well with other children in the Centre. She is a hardworking girl in school and does very well in poems. She has a high capacity to memorize all that she has been taught by her teachers.

Naomi is also responsible and loves to assist in the Kitchen.

The grandmother struggles to feed the household with her little earnings she gets from the sale of fruits. Sometimes her small scale business is affected by low demand due to increased market in the town making her to seek support in the Centre. The Centre has been very supportive in items of food.

Naomi's family is very happy. They used to live in a house that was threatening to fall anytime and MCP intervened to support them in construction of a new house. They now live in a three roomed house.
